A. Introduction

The expertise of Auditor(s) is crucial to the performance of the Internal Audit process of any Quality Management System, leading ultimately to the success of organizations. Use of Qualified Internal Auditors is a mandatory requirement of the Technical Specification IATF 16949: 2016. We conduct a comprehensive two-day training program delivered by faculty with extensive automotive background and time-tested auditing skills. This program is designed so that IATF 16949: 2016 Internal Auditor(s) thoroughly understand their role and acquire the learning needed to perform effective audits in their respective organizations.

B. Course Description

- Keeping in view limited professional help in qualifying Internal Auditors meeting these requirements, **Qualifast Group** has taken a major initiative in providing automotive customers with specialized trainings on IQA, Process Approach understanding, core tools viz. FMEA, MSA, SPC and Product Approval Process, etc.
- The course is in line with stringent Internal auditor requirements for IATF 16949:2016 from major automotive customers viz Daimler Chrysler, Ford, General Motors, Fiat and many others adding in.
- We strive to ensure our clients receive the most current information, and are provided with tools that will help them understand the new requirements.
- To acquire a practical understanding of IATF 16949: 2016 by focusing on the automotive process approach including Risk Analysis, changes to the Technical Specification, and how both impact auditing practices.
- This course will provide delegates with the skills and knowledge to properly conduct an internal audit of a process-based system.
- Upon successful completion, delegates will receive a certificate of successful completion.
- This course also involves hands on experience in auditing techniques and role plays.
